# RECOMMENDED ROUTINE (RR) — VISUAL FORM GUIDE

Darebee-Inspired Two-Step Anatomical Diagrams (1. Start → 2. Finish), Form Cues & All Alternate Pathways

**9 Exercises (3 Pairs + 1 Triplet)**
Frequency: **3x / Week Full Body**
Tempo: **1-0-X-0** | Sets: **3 × 5–8 (1 RIR)**

### 1. PAIRING & TRIPLET STRUCTURE

**Pairs (1–3):** Set 1 of Ex A → Rest 90s → Set 1 of Ex B → Rest 90s → Repeat for 3 sets.
**Core Triplet:** Ex 1 → 60s → Ex 2 → 60s → Ex 3 → 60s × 3 rounds. (Rest up to 3m if needed).

### 2. TEMPO (1-0-X-0) & FAILURE-1

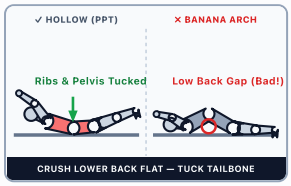

**1s** down, **0s** bottom pause, **X** explode up, **0s** top pause. Stop **1 rep short of failure** on Sets 1–2 (e.g., **7-7-7** instead of 8-6-5) to maximize clean volume.

### 3. PROGRESSION & RED HIGHLIGHTS

Start a level where you can do **5,5,5**. Build to **8,8,8**, then level up! **Red muscle shading** in each diagram shows the primary target muscles & motion vector.

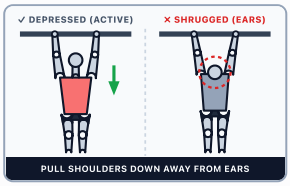

## PART 0: FUNDAMENTAL BODY MECHANICS (REQUIRED FOR ALL MOVES)

Master Hollow Body (PPT) & Scapular Control

### Hollow Body & Posterior Pelvic Tilt (PPT) — Core Lock

- **How to Lock In:** Tuck your tailbone under (pull belt buckle toward chin), squeeze glutes 100%, and pull lower ribs down into abs.
- **✓ Good:** Rigid cylinder from shoulders to ankles on Push-Ups, Rows, Pull-Ups, Dips, and Rollouts.
- **✕ Avoid:** Banana-back arch (flared ribs, sagging belly).

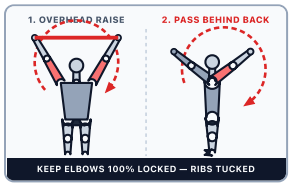

### 4 Scapular Positions (Shoulder Control) — Joint Safety

- **Depress (Down):** Pull shoulders away from ears (Pull-Ups, Dips, Support).
- **Retract (Pinch Back):** Pinch blades together (top of Rows, Arch Hangs).
- **Protract (Push Apart):** Spread blades wide (top of Push-Ups, Rollouts).
- **Elevate (Shrug Up):** Push shoulders into ears (Handstands).

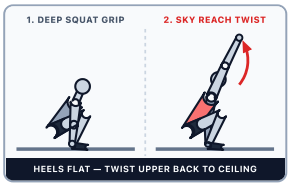

## PART 1: DYNAMIC WARM-UP — ALL 8 EXERCISES (5–10 MINS)

Do Moves 1–6 Every Session + Moves 7–8 Before Squat/Hinge Pairs

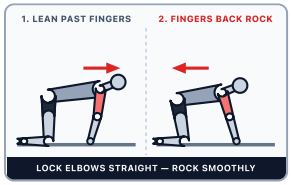

### 1. Yuri's Shoulder Band / Towel Warmup — 5–10 Reps

- Hold a band, towel, or broomstick with a wide overhand grip.
- Keep **elbows 100% locked**, shrug slightly overhead, pass behind back to glutes, then reverse smoothly.
- **✓ Good:** Ribs tucked down. **✕ Bad:** Bending elbows.

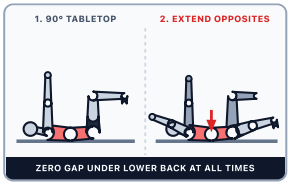

### 2. Squat Sky Reaches — 5–10 / Side

- Sit into a deep squat with heels flat on the floor. Grab left ankle with left hand, pinning left knee outward with elbow.
- Rotate upper back and reach right arm straight to the sky, following fingertips with eyes.

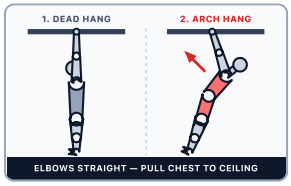

### 3. GMB Wrist Prep (4 Directions) — 10+ Reps

- On all fours with **elbows locked straight** and fingers spread wide:
- **(1)** Fingers forward, lean shoulders past fingertips; **(2)** Fingers facing knees, sit hips back; **(3)** Back of hands on floor; **(4)** First-knuckle palm pulses.

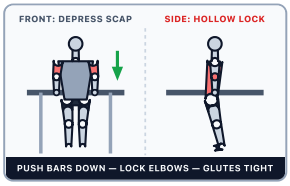

### 4. Deadbugs — 30 Seconds

- Lie on back, arms vertical, knees 90°. **Crush lower back flat into the floor** (posterior pelvic tilt).
- Extend opposite arm and leg just above floor while exhaling. **✕ Stop if** lower back arches off mat!

### 5. Arch Hangs (Add after Negative Pull-Ups) — 10 Reps

- Hang from pull-up bar with locked straight arms. Pull shoulder blades **down and together**, lifting sternum toward the ceiling.
- **✓ Good:** Arch upper back while keeping abs braced.

### 6–8. Support Hold + Warm-Up Squat/Hinge — 30s + 10 Reps

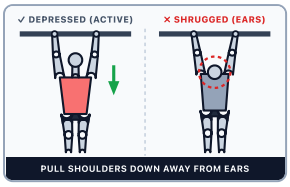

- **6. Parallel Bar Support Hold (30s):** Lock elbows, push shoulders down away from ears, hollow body.
- **7 & 8. Easier Squat & Hinge (10 reps each):** Warm up knees & hamstrings before Bulgarian Split Squats / Nordics.

# STRENGTH PAIR 1A: PULL-UP PROGRESSION — MAIN LADDER & ALL ALTERNATE PATHWAYS

3 Sets × 5–8 Reps | Tempo: 1-0-X-0 | Pair with Squats (90s Rest Between Exercises)

## MAIN RR PULL-UP PROGRESSION (LEVELS 1 TO 5)

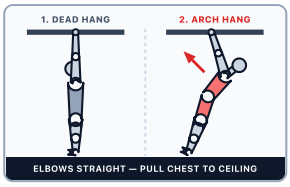

Primary Muscles Highlighted in Red: Latissimus Dorsi, Lower Traps, Rhomboids, Biceps

### Level 1: Scapular Pulls

3 × 5–8

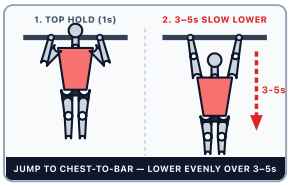

- Hang from bar with overhand shoulder-width grip and **locked elbows**.
- Without bending elbows, pull shoulder blades down away from ears (reverse shrug) so body rises 2–3 inches. Pause 1–2s at top, lower smoothly.

### Level 2: Arch Hangs

3 × 5–8

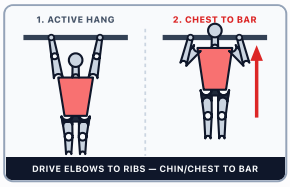

- Perform a Scapular Pull, then continue retracting shoulder blades to **arch your upper back** until your sternum faces the bar/ceiling.
- Keep elbows locked straight and abs/glutes tight. Build to **3×8** with 2s top pauses.

### Level 3: Negative Pull-Ups

3 × 5–8 (3–5s)

- Use a chair or jump to the top position (chin over bar, chest touching bar, shoulders depressed).
- Hold top for **1s**, then lower at an **even pace over 3–5 seconds** to a full dead hang. Build to 3×8 controlled 5s reps.

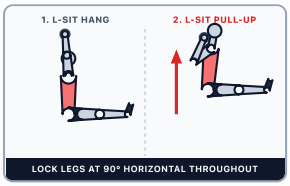

### Level 4: Full Pull-Ups (or Chin-Ups)

3 × 5–8

- Start in a dead hang (elbows locked). Lock legs straight in a **hollow body** slightly in front of torso.
- Depress scapulae and drive elbows down into your ribs until chin clears bar (or upper chest touches bar). Lower under control to full lockout.

## LEVEL 5 & ALL OFFICIAL ALTERNATE PULL-UP PATHWAYS (WEIGHTED vs. BODYWEIGHT / BWF WIKI)

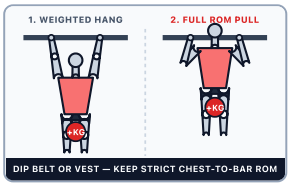

Choose Your Path After Mastering 3×8 Clean Pull-Ups

### Path A: L-Sit Pull-Ups (Equipment-Free)

3 × 5–8

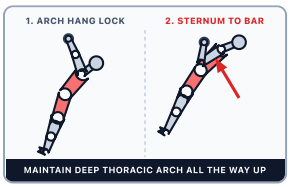

- From a dead hang, lift straight legs to a **90° horizontal L-Sit** (or start with a **Tuck L-Sit**).
- Hold the L-Sit strictly horizontal throughout every pull-up. Shifts center of gravity forward for massive lat & core overload without weights.

### Path B: Weighted Pull-Ups (PDF Summary Path)

3 × 5–8

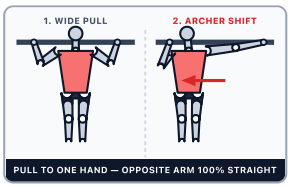

- Attach external weight via a dip belt, weight vest, or dumbbell held between ankles/thighs.
- Start light (+2.5 kg), build from **3×5 → 3×8** with full chest-to-bar range of motion, then increase load.

### Path C: Chest-to-Bar & Arch Hanger Pull-Ups

3 × 5–8

- **High Chest-to-Bar:** Pull explosively so the bar touches your lower sternum below the pecs.
- **Arch Hanger Pull-Ups:** Lock in an Arch Hang and pull your sternum to the bar while **maintaining that 45° thoracic arch** all the way up and down.

### Path D: Typewriter & Archer Pull-Ups

3 × 5–8 / Side

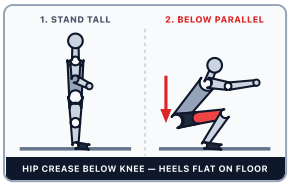

- **Typewriter Pull-Ups:** Pull chin above wide bar, slide horizontally left-to-right across the bar keeping chin above bar level, then lower.
- **Archer Pull-Ups:** Pull toward one hand while keeping the opposite arm **100% locked straight** on the bar (or on a towel).

## STRENGTH PAIR 1B: SQUAT PROGRESSION — MAIN LADDER & ALL ALTERNATE PATHWAYS

3 Sets × 5–8 Reps / Leg | Tempo: 1-0-X-0 | Pair with Pull-Ups (90s Rest)

### MAIN RR SQUAT PROGRESSION (LEVELS 1 TO 6 — SHRIMP SQUAT PATHWAY)

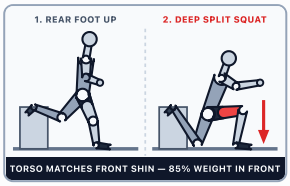

Primary Muscles Highlighted in Red: Quadriceps, Gluteus Maximus, Gluteus Medius, Adductors

#### Level 1: Assisted Squat → Level 2: Squat

3 × 5–8

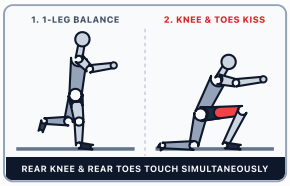

- **Level 1 (Assisted):** Hold a post/frame in front of you for balance as you sit into a full-depth squat.
- **Level 2 (Full Squat):** Feet shoulder-width, toes out 15–30°. Track knees over toes until **hip crease drops below knee height** with flat back and flat heels.

#### Level 3: Split Squat → Bulgarian Split Squat

3 × 5–8 / Leg

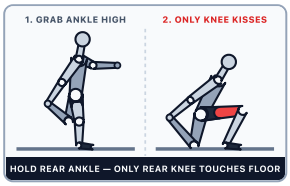

- **Split Squat (Wiki Lvl 3a):** Stationary lunge with both feet on floor; rear knee kisses floor.
- **Bulgarian Split Squat (PDF Lvl 3):** Elevate rear foot (laces down) on a chair behind you. Lower under control until rear knee nearly touches floor; match torso lean to front shin angle.

#### Level 4: Beginner Shrimp Squat

3 × 5–8 / Leg

- Stand on one leg, lift non-working foot behind you (knee bent 90°), and reach arms forward for counterbalance.
- Squat down until your **rear knee and rear toes touch the floor at the exact same time**, then drive up through the front mid-foot.

#### Level 5: Intermediate → Level 6: Adv. Shrimp

3 × 5–8 / Leg

- **Level 5 (Intermediate Shrimp):** Hold rear ankle behind you with **one hand**. Lower until **only your rear knee kisses the floor** (rear foot stays in the air).
- **Level 6 (Advanced Shrimp):** Hold rear ankle behind your back with **BOTH hands** as rear knee kisses floor.

### ALL OFFICIAL ALTERNATE SQUAT PATHWAYS (PISTOL SQUATS, DEEP STEP-UPS & BARBELL SQUATS)

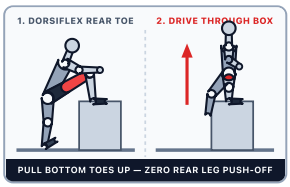

Can Be Used Alongside or Instead of Shrimp Squats at Levels 4–6

#### Alt Path A: Pistol Squat Progression

3 × 5–8 / Leg

- **Step 1 (Box Pistol):** Sit back on one leg to touch a chair while extending free leg straight ahead; lower surface height over time.
- **Step 2 (Counterbalanced / Assisted):** Hold a light book/weight forward or lightly touch a doorframe at the bottom.
- **Step 3 (Full Pistol Squat):** Descend until hamstring rests on calf with working heel glued flat to the floor.

#### Alt Path B: Deep Step-Ups & Barbell Squats

3 × 5–8 / Leg

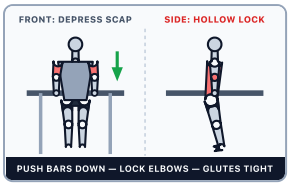

- **Deep Step-Ups (Wiki Alternate):** Place working foot on a high box/chair. Lean torso over front knee and press all the way up. **Crucial Rule:** Pull bottom toes UP (dorsiflexion) so the rear leg cannot push off the floor!
- **Barbell Back / Front Squat (Gym Alternate):** If a barbell is available, perform 3×5–8 Barbell Squats.

## STRENGTH PAIR 2A: DIP PROGRESSION — MAIN LADDER & ALL ALTERNATE PATHWAYS

3 Sets × 5–8 Reps | Tempo: 1-0-X-0 | Pair with Hinges (90s Rest Between Exercises)

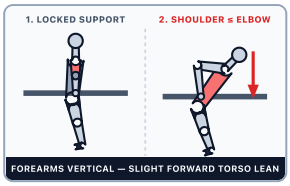

### MAIN RR DIP PROGRESSION (LEVELS 1 TO 4)

Primary Muscles Highlighted in Red: Pectoralis Major, Anterior Deltoids, Triceps Brachii

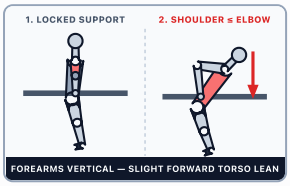

**Level 1: Parallel Bar Support Hold** — Build to 60s

- Jump to straight-arm support on parallel bars. Lock elbows 100% and push shoulders down away from ears (**scapular depression**).
- Squeeze glutes and hold a hollow body for a solid **60-second hold** before progressing.

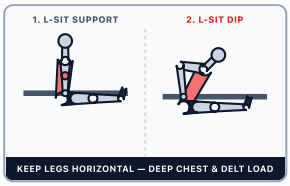

**Level 2: Negative Dips** — 3 × 5–8 (3–5s)

- Start in top Support Hold. Lean torso slightly forward (~15°), keep forearms vertical, and lower slowly over **3–5 seconds** until shoulders drop below elbow level.
- Step onto floor/box to return to top support for each rep.

**Level 3: Parallel Bar Dips** — 3 × 5–8

- Lower under control with elbows tucked close to sides and forearms vertical until your shoulder crease passes elbow height (90°+ bend).
- Press forcefully back to locked elbows and depressed shoulders at the top. Keep legs straight (not crossed behind butt).

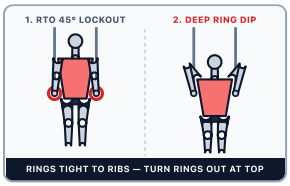

**Level 4: L-Sit Dips OR Weighted Dips** — 3 × 5–8

- **Bodyweight Path (L-Sit Dips):** Hold legs straight out in front (Tuck L-Sit → Full L-Sit) throughout the entire dip set.
- **Weighted Path (Weighted Dips):** Add weight progressively on a dip belt (+2.5 kg increments) once 3×8 dips are clean.

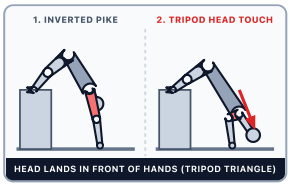

### ALL OFFICIAL ALTERNATE DIP PATHWAYS (RING DIPS & OVERHEAD HANDSTAND PUSH-UP PATH)

Wiki Alternates for Gymnastic Rings OR Overhead Pressing Replacement

**Alt Path A: Ring Support → Ring Dips → Bulgarian** — 3 × 5–8

- **Prerequisite:** 60s Ring Support Hold with Rings Turned Out (RTO 45°).
- **Ring Dips:** Keep rings tight against ribs as you lower to 90°, press up, and turn rings out (RTO) at the top of every rep.

**Alt Path B: Overhead HSPU Path (No Dip Bars)** — 3 × 5–8

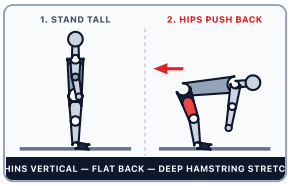

- Official RR replacement if you lack dip bars: **Lvl 1: Floor Pike Push-Ups → Lvl 2: Box-Elevated Pike Push-Ups → Lvl 3–4: Wall Headstand Push-Ups (HeSPU)**.
- ✓ **Crucial Cue:** Lean forward at bottom so your head lands **in front of your hands** forming an Equilateral Tripod Triangle!

## STRENGTH PAIR 2B: HINGE PROGRESSION — MAIN LADDER & ALL ALTERNATE PATHWAYS

3 Sets × 5–8 Reps | Tempo: 1-0-X-0 | Pair with Dips (90s Rest Between Exercises)

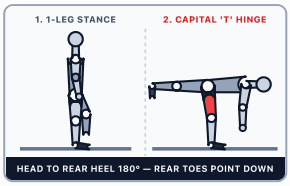

### MAIN RR HINGE PROGRESSION (LEVELS 1 TO 5 — RDL TO NORDIC CURL PATHWAY)

Primary Muscles Highlighted in Red: Hamstrings (Biceps Femoris, Semitendinosus), Glutes, Erectors

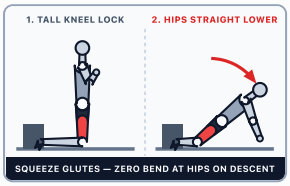

#### Level 1: Romanian Deadlift (Two-Leg Hip Hinge) — 3 × 5–8

- Stand hip-width apart. Unlock knees slightly (~15°) and freeze shins vertical.
- Brace core and **push your hips straight back toward the wall behind you** until your flat torso reaches parallel with the floor. Squeeze glutes to return.

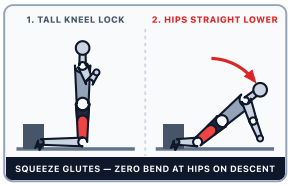

#### Level 2: Single-Legged Deadlift (SL-RDL) — 3 × 5–8 / Leg

- Balance on one leg with a soft 15° knee bend. Hinge at the hip while extending your non-working leg straight behind you like a seesaw into a **Capital "T"**.
- ✓ **Crucial Cue:** Point the toes of your raised back foot **straight down at the floor** to keep your hips square!

#### Level 3: Banded / Eccentric Nordic Negatives — 3 × 5–8 (4–5s)

- Kneel on a pad with ankles anchored firmly under a heavy couch, bed frame, or strap.
- Squeeze glutes into PPT so **knees, hips, and shoulders form one straight line**. Lower slowly over **4–5 seconds** toward the floor, catch gently with hands, and push back up.

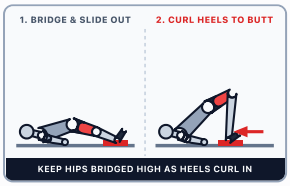

#### Level 4: Banded Nordic → Level 5: Full Nordic Curl — 3 × 5–8

- **Level 4 (Banded / Assisted Nordic):** Hold a band anchored behind you (or slide hands over an elevated box) to assist the bottom reversal.
- **Level 5 (Full Nordic Curl):** Lower to the floor and curl your entire bodyweight back up using pure hamstring knee flexion with zero hip bend.

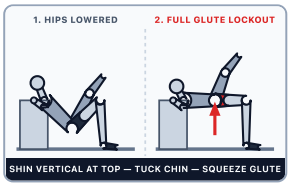

### ALL OFFICIAL ALTERNATE HINGE PATHWAYS (SLIDING HAMSTRING CURLS & HIP THRUSTS)

100% Equipment-Free Bridges Between Level 2 (SL-RDL) and Level 3–5 (Nordic Curls)

#### Alt Path A: Slick Floor / Towel Hamstring Curls — 3 × 5–8

- Lie on back on a wood/tile floor with heels on a folded towel. Bridge hips up, slide heels out until legs are nearly straight, then **dig heels down and curl them back under your glutes** while keeping hips bridged high.
- **Progression:** Two-Leg Sliding Curl → Single-Leg Sliding Hamstring Curl.

#### Alt Path B: Single-Leg Hip Thrust & Harop Curl — 3 × 8–12

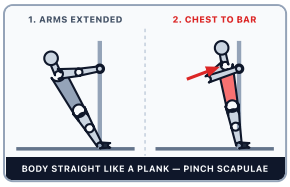

- **Single-Leg Shoulder-Elevated Hip Thrust:** Rest upper back on couch edge, plant one foot so shin is **vertical at top**, tuck chin, and drive hips to full glute lockout (2s pause).
- **Harop Curl:** Nordic curl with a slight hip hinge on the descent to bridge the gap to strict Nordics.

## STRENGTH PAIR 3A: ROW PROGRESSION — MAIN LADDER & ALL ALTERNATE PATHWAYS

3 Sets × 5–8 Reps | Tempo: 1-0-X-0 | Pair with Push-Ups (90s Rest Between Exercises)

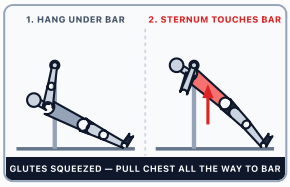

### MAIN RR ROW PROGRESSION (LEVELS 1 TO 5)

Primary Muscles Highlighted in Red: Mid-Traps, Rhomboids, Rear Delts, Lats, Biceps

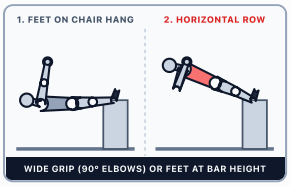

**Level 1: Vertical Row → Level 2: Incline Row** — 3 × 5–8

- **Level 1 (Vertical):** Stand facing a post/doorframe with feet close to base; lean back and pull chest to hands.
- **Level 2 (Incline Row):** Use a chest-high bar at ~45° body angle. Keep body rigid and pull chest to bar.

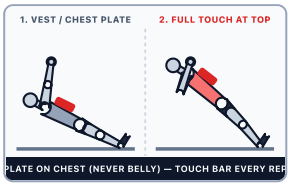

**Level 3: Horizontal Rows (Inverted Row)** — 3 × 5–8

- Hang under a waist-high bar with heels on the floor and body in a straight reverse plank (glutes squeezed).
- Depress shoulders, retract shoulder blades, and drive elbows back (~45°) until your **lower chest physically touches the bar**.

**Level 4: Wide Rows & Feet-Elevated Rows** — 3 × 5–8

- **Wide Rows (PDF Lvl 4):** Grip 1.5× shoulder width and flare elbows out at **90°**, pulling upper chest to bar (hits rear delts & upper back).
- **Feet-Elevated Rows:** Prop heels on a chair at bar height so body is horizontal at the top.

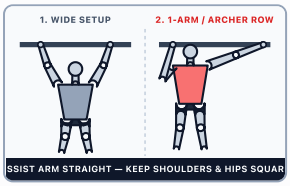

**Level 5A: Weighted Inverted Rows (PDF Path)** — 3 × 5–8

- Wear a weight vest or rest a weight plate on your chest (never on your belly where it causes hip sag).
- Pull chest all the way to the bar on every rep with full scapular retraction.

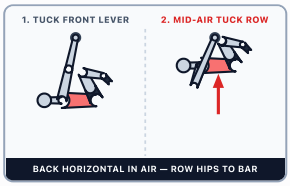

### ALL OFFICIAL ALTERNATE ROW PATHWAYS (ARCHER / ONE-ARM ROWS & FRONT LEVER ROWS)

100% Bodyweight Mastery Pathways After Level 4 Horizontal / Wide Rows

**Alt Path A: Archer Rows → One-Arm Rows** — 3 × 5–8 / Side

- **Archer Rows:** Row up with one arm while keeping the assisting arm **100% locked straight** out to the side.
- **One-Arm Rows:** Hold bar with one hand, take a wider foot stance, and row chest to bar while keeping shoulders and hips completely square.

**Alt Path B: Tuck Front Lever Pulls & Rows** — 3 × 5–8

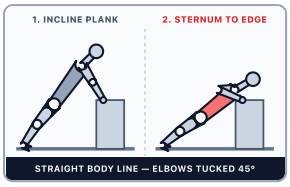

- **Done on Pull-Up Bar!** Hang from bar, tuck knees to chest, and press down with straight arms until your **back is horizontal to the floor in mid-air**.
- From that horizontal hang, row your hips/chest up toward the bar while keeping your torso parallel to the floor!

## STRENGTH PAIR 3B: PUSH-UP PROGRESSION — MAIN LADDER & ALL ALTERNATE PATHWAYS

3 Sets × 5–8 Reps | Tempo: 1-0-X-0 | Pair with Rows (90s Rest Between Exercises)

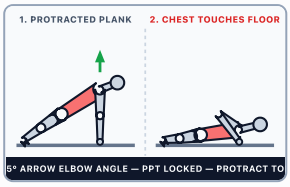

### MAIN RR PUSH-UP PROGRESSION (LEVELS 1 TO 5)

Primary Muscles Highlighted in Red: Pectoralis Major, Anterior Delts, Triceps, Serratus Anterior

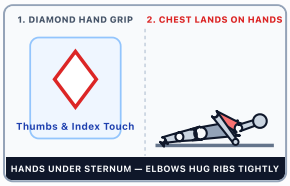

**Level 1: Vertical → Level 2: Incline Push-Up** — 3 × 5–8

- Place hands on an elevated surface (wall → counter → table → chair) rather than doing knee push-ups so you train full-body hollow tension.
- Lower until sternum touches the edge with elbows tucked ~45°, then press to full protraction.

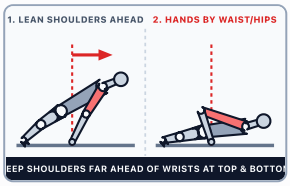

**Level 3: Full Push-Up** — 3 × 5–8

- Hands shoulder-width, externally rotate arms ("screw hands into floor"). Lock pelvis in **Posterior Pelvic Tilt (PPT)**.
- Lower with elbows at a **45° arrow angle** until chest touches floor. Press up and **protract scapulae** at top.

**Level 4: Diamond Push-Up** — 3 × 5–8

- Place hands close together directly underneath your sternum so index fingers and thumbs form a diamond (or sit 1–2" apart).
- Keep elbows brushing your ribs as your chest lowers onto your hands, then press to full lockout and protraction.

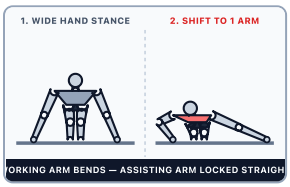

**Level 5: Pseudo Planche Push-Up (PPPU)** — 3 × 5–8

- Turn fingers **45–90° outward** (or backward). **Lean shoulders far forward past your wrists** so hands sit down near your waist/hips.
- ✓ **Crucial Rule:** Maintain that forward shoulder lean at both bottom AND top without rocking backward!

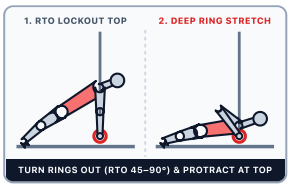

### ALL OFFICIAL ALTERNATE PUSH-UP PATHWAYS (ARCHER / ONE-ARM PUSH-UPS & RING PUSH-UPS)

Wiki Alternates for Unilateral Pushing Strength OR Gymnastic Rings

**Alt Path A: Archer → One-Arm Push-Up** — 3 × 5–8 / Side

- **Archer Push-Ups:** Hands 2× shoulder width. Shift weight over one hand and lower chest to that hand while keeping the **assisting arm 100% locked straight**.
- **One-Arm Push-Up:** Straddle feet wide, place one hand under sternum, keep hips/shoulders square, and press with one arm.

**Alt Path B: Ring Push-Ups → RTO Push-Ups** — 3 × 5–8

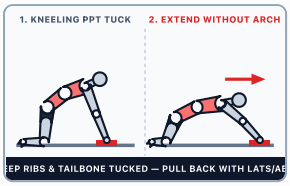

- **Ring Push-Ups:** Lower into a deep chest stretch on floor-level rings, press up, and **Turn Rings Out (RTO 45–90°)** at the top.
- **RTO Push-Ups / Ring PPPU:** Keep rings turned out (palms forward) throughout the entire descent AND ascent.

## PART 3: CORE TRIPLET — ALL 3 CATEGORIES & ALL ALTERNATE PATHWAYS

Circuit: Do C1 → 60s Rest → C2 → 60s Rest → C3 → 60s Rest × 3 Rounds (Target: 3 × 8–12 or 30s)

### CORE 1: ANTI-EXTENSION PROGRESSION (RING/TOWEL AB ROLLOUTS OR HANGING LEG RAISES)

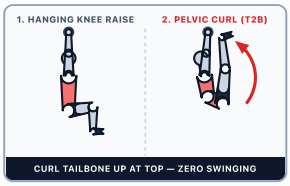

Resists Lumbar Hyperextension & Strengthens Rectus Abdominis, Transverse Abdominis & Lats

#### Path A: Plank → Ring / Towel Ab Rollouts

3 × 8–12

- **Lvl 1: RKC Plank (30s):** Forearm plank with glutes/quads squeezed 100% and tailbone tucked (PPT).
- **Lvl 2–4: Kneeling Ab Rollouts (Rings, Wheel, or Towel on Slick Floor):** Lock pelvis in PPT, slide hands forward only as far as lower back stays flat/hollow, then pull back through lats & abs.

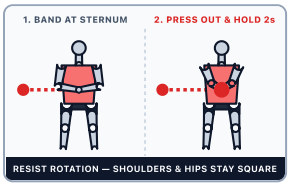

#### Path B: Hanging Knee / Leg Raises (Toes-to-Bar)

3 × 8–12

- **Progression:** Lying Tuck → **Hanging Knee Raises** → **Hanging Straight-Leg Raises (90°)** → **Toes-to-Bar**.
- ✓ **Crucial Cue:** At the top of every rep, **curl your tailbone/pelvis upward** so your lower back rounds and your abs contract fully. Zero swinging!

### CORE 2: ANTI-ROTATION PROGRESSION (BANDED PALLOF PRESS OR COPENHAGEN / SIDE PLANK)

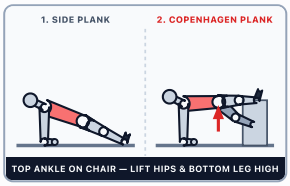

Resists Torso Twist & Lateral Pelvic Drop — Obliques, Quadratus Lumborum, Glute Medius, Adductors

#### Path A: Banded Pallof Press (or Ring Pallof)

3 × 8–12 / Side

- Stand sideways to a chest-high band anchor, pull band to sternum, press straight out in front of chest, pause 2s resisting rotation, and return.
- Can also be performed as a single-arm Ring Pallof plank rollout.

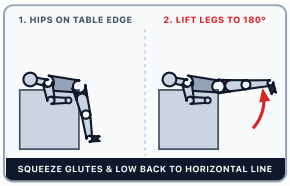

#### Path B: Side Plank → Copenhagen Side Plank

3 × 8–12 or 30s

- **100% Equipment-Free Path:** Start with **Side Plank (30s/side)** with elbow directly under shoulder.
- **Copenhagen Plank (Knee → Ankle Lever):** Rest top knee or top ankle on a chair seat, drive hips up into a straight line, and lift bottom leg off the floor for **30s holds or 8–12 hip lifts**.

### CORE 3: EXTENSION PROGRESSION (REVERSE HYPEREXTENSION OR ARCH BODY HOLDS / ROCKS)

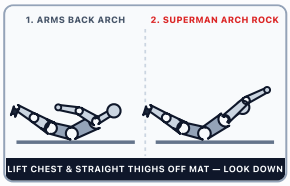

Strengthens Posterior Chain — Spinal Erectors, Multifidus, Gluteus Maximus, Upper Back

#### Path A: Reverse Hyperextension (PDF Path)

3 × 8–12

- Lie prone on a sturdy table, counter, or high bed with your **hip crease right on the edge** so legs hang down. Grip sides firmly.
- Squeeze **glutes + lower back** to lift straight legs until parallel with torso (180°). Pause 1s at top, lower slowly.

#### Path B: Arch Body Hold → Arch Body Rocks

3 × 30s / 8–12

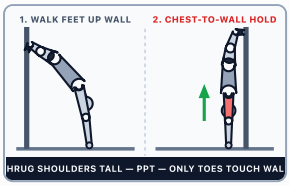

- **Floor Alternate:** Lie face down on floor. Squeeze glutes, lock knees, and lift chest, arms, and thighs off floor so only belly rests on mat.
- **Progression:** Arms behind back → Arms overhead (Superman) → **Arch Body Rocks**.

## PART 4: OFFICIAL RR SKILL DAY ROUTINE & PHASE 2 BODYWEIGHT ISOLATION MOVES

Practiced on Rest Days (e.g., Sunday) OR Before Strength Work

### OFFICIAL /R/BODYWEIGHTFITNESS SKILL DAY MOVES (BALANCE, COMPRESSION & SHOULDER MOBILITY)

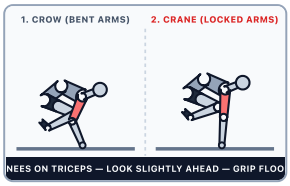

Focus on Motor Control & Balance — Stop Before Fatigue!

#### 1. Wall Plank → Chest-to-Wall Handstand

5–10 Min Practice

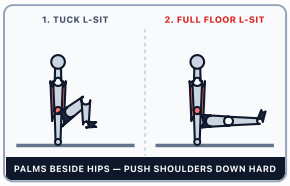

- Walk feet up the wall facing the wall until hands are 2–4" from baseboard (**Chest-to-Wall**, never back-to-wall).
- **3 Key Cues: (1)** Push floor away to **elevate shoulders into ears**; **(2)** Lock pelvis in **PPT**; **(3)** Press fingertips into floor ("heel pulls") to float toes off wall.

#### 2. Frog Stand / Crow Pose → Crane Pose

5 Min Practice

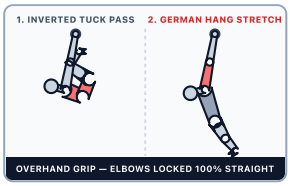

- Place palms shoulder-width on floor, rest knees on backs of triceps, and lean shoulders forward until feet float up. Look slightly ahead on floor.
- **Crane Pose Upgrade:** Perform with **100% locked straight elbows** and strong scapular protraction.

#### 3. L-Sit Progression & Pike Compression

60s Total Hold

- **Floor/Bar L-Sit:** Sit tall, place palms beside hips, lock elbows, and push shoulders DOWN hard to lift hips & legs.
- **Levels:** Foot-Supported → 1-Leg Supported → Tuck L-Sit → Full L-Sit (+ 3×10s Seated Pike Leg Lifts).

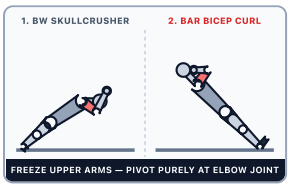

#### 4. Skin the Cat & German Hang (Pull-Up Bar)

2–3 × 3–5 Reps

- Hang with an **overhand grip** and locked elbows. Tuck knees to chest and invert backward through your arms.
- Lower slowly into a mild shoulder-extension stretch (**German Hang**), then pull hips up and rotate back to dead hang.

### BONUS (FROM PROGRAM.MD): 5-MINUTE BODYWEIGHT V-TAPER & ARM ISOLATION FINISHER

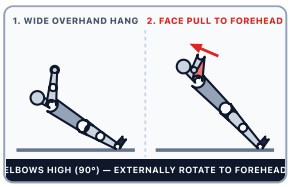

Optional Post-RR Finisher (2–3 Sets × 10–15 Reps — Zero Dumbbells or Bands Required)

#### Bodyweight Tricep Extensions & Bar Bicep Curls

2–3 × 10–15

- **BW Tricep Extensions (Skullcrushers):** Incline plank on bar; freeze upper arms and bend ONLY at elbows to lower forehead under bar, then extend.
- **Underhand Bar Bicep Curls:** Hang under row bar with supinated grip; keep elbows high in front of torso and curl forehead to bar.

#### Inverted Face Pulls & Side-Plank Powell Raises

2–3 × 12–15

- **Wide-Grip Inverted Face Pulls:** Lean back on row bar at 45°, flare elbows high (90°), and externally rotate shoulders to pull bar to your **forehead** (1s pause).
- **Side-Plank Powell Raise / Wall Lateral Press:** Isolate lateral & rear delts with zero equipment.

**Darebee-Inspired RR Form Manual:** Every move features 2-step anatomical vector poses (**1. Start → 2. Finish**), Red Target Muscle Shading, directional motion vectors, and bottom cue banners.
